📄 PROFILE

Internship Seeker – Computer Science Undergraduate

Actively seeking internship opportunities in:

- Software Development
- Web/Application Development
- Data Science / Machine Learning
- Backend Engineering

🧠 SKILLS

Programming Languages:

- C++
- Java
- Python

Web & App Development:

- HTML, CSS, JavaScript
- Node.js
- Backend integration
- RESTful concepts

Data Science & Analytics:

- Data Cleaning
- Exploratory Data Analysis (EDA)
- Classification Models

Model Evaluation

Databases:

- SQL
- MongoDB

Core CS Concepts:

- Data Structures & Algorithms
- Object-Oriented Programming
- Database Design
- Problem Solving

🎓 EDUCATION

Bachelor of Science in Computer Science (BCS)

COMSATS

Currently in 7th Semester

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Advanced Database Systems, Data Science, Operating Systems

FSc

PGC Mailsi

Matric

APS Kharian

📁 PROJECTS

Personal Finance Management App (DSA-Based Optimization Project)

- Designed and implemented optimized searching algorithms for transaction retrieval
- Improved account management efficiency using appropriate data structures
- Applied algorithmic complexity analysis to enhance performance
- management

Sports News Website (Advanced Database Project)

- Built a full-stack sports news platform
- Frontend: HTML, CSS, JavaScript
- Backend: Node.js
- Database: SQL / MongoDB
- Implemented CRUD operations and database connectivity

Data Science Pipeline Project

- Performed data preprocessing and cleaning
- Conducted Exploratory Data Analysis (EDA)
- Applied classification algorithms
- Evaluated model performance using standard metrics
- Implemented end-to-end data pipeline in Python

E-Commerce Mobile App (Flutter – Basic Level)

- Developed a basic cross-platform e-commerce application using Flutter
- Implemented product listing, product detail view, and cart functionality
